Subject: RM 10.9 meeting today....

Hi Stan,

The following, in no particular order, are a few of the items we would like to discuss at the meeting today. I'm sure there are additional topics that you would like to discuss as well, or that may come up.

Also, would it be possible for someone developing the website (Tony Bianchini or Ray German) to participate via phone? I think it would be useful for them to hear the conversation so that we can get the design of the website finalized.

1. Water Quality Monitoring Plan -- action levels, flow rates
2. Perimeter Air Monitoring Plan – finalize details based on our walkthrough prior to the meeting, as well as discuss the QAPP
3. Dredging tolerances – we want to clarify this issue further, there is still some uncertainty based on your response to comments
4. Status of contractor work plans
5. Submission of final design plans
6. Bathymetry survey
7. Reporting schedule – where will reports be posted?
8. Status of clearing activities in park
9. Status of Clean Earth facility
10. Work schedule
11. Develop punch list of activities that must be completed prior to the start of dredging

12. Website development

See you soon,

Stephanie
